1. Preface

Although I did not end up purchasing a drink here on this particular evening, I first went into this pharmacy/convenience store to possibly purchase a beverage. Yet as soon as I entered, I heard a small girl, approximately five to seven years of age, crying and screaming in order to try and convince about five much larger adults that she would be better off if she did not receive an injection. The contents of the syringe that was recommended to be thrust into her arm was likely made of ingredients that this little girl was not familiar with, nor was it likely that many if not all of the others who were with her were familiar with them either. Her persistence was valiant. She won this confrontation and did not get a shot. I was encouraged by her strength, courage, and by her strong conviction not to get jabbed.

“Verily I say unto you, Whosoever shall not receive the kingdom of God as a little child shall in no wise enter therein.”
Luke 18:17 KJV

“Out of the mouth of babes and sucklings hast thou ordained strength because of thine enemies, that thou mightest still the enemy and the avenger.”

With many COVID-19 vaccines peeking over from behind the yet to be approved for mass consumption wall, and with one of them already approved and released out into the world but not yet widely distributed or injected into many people's arms as of yet; rumors of draconian measures being proposed to be taken to attempt to convince even those not convinced that taking some of the proposed vaccines would be wise; a belief that taking some of these vaccines would also be considered immoral due to them being originally produced with or containing aborted baby fetal cell tissue; a belief that genetically engineered cells, or synthetic cells, as is used in some of these Covid-19 vaccines, like genetically engineered food, should not be taken into the body; a feeling that some of these vaccines are yet unproven since they are using new technologies never used before other than in trials and that they are being released long before the often considered safer 10 to 15 year testing period for such vaccines has been accomplished; and also a belief that safer, more effective ways to deal with such a pandemic are available; it seems appropriate to comment on the Covid-19 situation.

2. Alleged Causes of the COVID-19 Virus

There are a variety of ways that different sources have put forth regarding the origin of the novel coronavirus, SARS-CoV-2, which causes the Coronavirus Disease-2019, aka COVID-19.

Largely, the mainstream narrative suggests that this novel coronavirus is a zoonotic virus that came forth from a wet market in Wuhan, China, called the Huanan Seafood Wholesale Market, where various creatures were coexisting. Wet markets often sell a wide variety of exotic or non-exotic live mammals, poultry, fish, and reptiles.

If SARS-CoV-2, which triggers Covid-19, was indeed a zoonotic virus, widespread veganism could be adopted to try to help prevent other zoonotic plagues from arriving in the future. Or even if Covid-19 was not a zoonotic virus, because so many other alleged zoonotic viruses—for example, SARS, bird flu, swine flu, and more—have arrived due to the raising of animals to be eaten, or through keeping such creatures close together in small cages while awaiting slaughter, taking such health affirming dietetic options could possibly not only improve your health but also help prevent future zoonotic plagues from rearing their heads.

Another theory was put forth by a Chinese virologist, Dr. Li-Meng Yan, a former researcher at the Hong Kong School of Public Health, who claims SARS-CoV-2 could conveniently be made in the laboratory in as little as six months and that it was derived in the lab by combining two different bat viruses together. The paper she authored with two others is called, "Unusual Features of the SARS-CoV-2 Genome Suggesting Sophisticated Laboratory Modification Rather Than Natural Evolution and Delineation of Its Probable Synthetic Route."

Yet, I would suspect, her expert testimony would likely be dismissed as crazy talk by those frothing at the mouth to attempt to convince us all to line up to take unproven drugs that could end up harming us more than helping us when there are more viable

options available. For her testimony, if authentic, could likely show that this whole pandemic was one of the following: a planned event, a lab accident, or a very swarthy lab created virus that was able to produce enough of an authentic looking day pass to the lab security officers in order for it to slip out into the world. Yet whether it was planned, an accident, a swarthy lab created virus, a zoonotic virus, or something else, our reaction to it should be guided by God's teachings above all else.

The Wuhan Institute of Virology is located just a few miles from the reported ground zero of the pandemic at the Wuhan wet market. Yet this wet market was not reported to have been housing bats, from which the virus was alleged to have originated from. The above paper notes, "SARS-CoV-2 shows biological characteristics that are inconsistent with a naturally occurring, zoonotic virus." "The first thing is the [meat] market in Wuhan ... is a smoke screen and this virus is not from nature," Yan claimed. She explains that she got "her intelligence from the CDC in China, from the local doctors."

If SARS-CoV-2, which triggers Covid-19, was indeed created in a laboratory, and was either accidentally or purposefully spread throughout humanity, Christianity or even widespread Christianity could be further practiced or adopted by one or many to help stop or reduce such lab created plagues from being developed or from being released on the world in the future, and to help to deal with the one that is currently still here or any that might hereafter be revealed.

3. Covid Stats

Although previously, it was thought that the first death that occurred possibly involving Covid-19 was in Washington State, it has subsequently been reported that the first death of someone who tested positive for Covid-19 in the U.S. actually occurred in Santa Clara, California, on February 6, 2020.

Although we have yet to reach the one year mark since this alleged first Covid-19 related death, as of December 10, 2020, the CDC lists the current amount of Covid-19 deaths, including deaths with comorbidities, as 289,431.

But instead of using this number, to make the math easier, let's use 250,000 as the reported amount of Covid-19 deaths in America, if comorbidity deaths are also included in this number.

Covid-19 deaths, including deaths with comorbidities, of about 250,000, divided by the U.S. population of about 330 million, times 100, equals what is the percentage of Americans who have died due to Covid-19 while including those deaths with comorbidities. Rounded to the third decimal point, this comes out to about 0.076%.

So the risk of dying from Covid-19, including deaths with comorbidities, was at about a 0.076 percentile, or, in other words, not very likely.

And the risk of dying from Covid-19 alone, without including deaths with comorbidities, was at about 0.005%.

(0.076% * 0.06 = 0.00456% rounded to 0.005%)

So if the CDC was correct when they reported in late August, 2020, that Covid deaths occurring from Covid alone, along with no other health issues, was about six percent of the total reported Covid-19 death count, or about 15,000 deaths, then the risk of dying from Covid-19 is at about 0.005%.

So Covid-19 has a survivability rate of about 99.924%, if calculating it while including reported deaths with comorbidities, or a survivability rate of around 99.995%, if calculating it while using only reported deaths from Covid-19 alone.

Does this sound like a valid reason to destroy the economy?

Since the two greatest causes of death in the U.S. are Heart disease and Cancer, let's put are focus on these issues. If you consider Covid-19 deaths including those with comorbidities, this would currently be third on the cause of death list. And this would be followed by Cardiovascular disease, Alzheimer's disease, Diabetes, and then Influenza/Pneumonia. Yet if you only considered Covid-19 deaths that have occurred from Covid alone, it would be more on par with the amount of deaths caused by Influenza/Pneumonia. Yet it is likely that since Influenza/Pneumonia deaths have dropped dramatically since this Covid-19 situation began, that there has possibly been little to no increase in the total amount of deaths due to Covid-19. Yet if it has increased, this could be entirely due to Covid, or it is possible that this has occurred due to other reasons, for example, increases in suicide rates and drug overdoses due to increases in the perceived amount of hopelessness and difficulties encountered due to the overreaction to this plague, or for other reasons.

4. Why Christians and Others Who Value Life Should Be against Taking a COVID-19 Vaccine Made of or Produced Using Cells from Aborted Children Who Were Created in the Image of God and Killed without Their Consent

According to God, life begins before the child is born.

"Before I formed thee in the belly I knew thee; and before thou camest forth out of the womb I sanctified thee, and I ordained thee a prophet unto the nations."

Jeremiah 1:5 KJV

John the Baptist was filled with the Holy Ghost even from his mother's womb.

"For he shall be great in the sight of the Lord, and shall drink neither wine nor strong drink; and he shall be filled with the Holy Ghost, even from his mother's womb."

Luke 1:15 KJV

Therefore, taking the life of an unborn child is murder. Yet God indicates that murder is wrong.

"Thou shalt not kill."

Deuteronomy 5:17 KJV

Going against what God teaches is what caused disease and death to first come into the world. Even if another tells you that you would be better off disregarding God's instructions, by deceitfully reasoning with you or by some other means, this does not mean you should do it. For it is best not to disregard God's commandment about loving your neighbor as yourself. For wouldn't this be broken by killing or approving of the killing of an unborn child, or by using fetal cell tissue from that killed child to your alleged medical benefit? Knowledge was what was sought in the taking of the fruit from the tree of the knowledge of good and evil, therefore, if our medical knowledge without using fetal cell tissue, while using such could be considered going against God's instructions, is not enough to create a vaccine, then don't create it. Yet if it is created, don't use it.

Yet God's grace extends to those who turn to God for God's mercy. For even if one were to create or take a vaccine that one later believed was not right in God's eyes, after repenting of such, if indeed God is against the creation or use of such vaccines, as I believe, according to God's Word, God is, people could still be fully forgiven via what Christ did for us on the cross at Calvary. God's mercy is unfathomable.

Yet consider how the serpent, the Devil, tried to convince Eve that disobeying God was the best option for her.

"Now the serpent was more subtil than any beast of the field which the Lord God had made. And he said unto the woman, Yea, hath God said, Ye shall not eat of every tree of the garden? And the woman said unto the serpent, We may eat of the fruit of the trees of the garden: But of the fruit of the tree which is in the midst of the garden, God hath said, Ye shall not eat of it, neither shall ye touch it, lest ye die. And the serpent said unto the woman, Ye shall not surely die: For God doth know that in the day ye eat thereof, then your eyes shall be opened, and ye shall be as gods, knowing good and evil."

Genesis 3:1-5 KJV

This seemed convincing to Eve, and even reasonable to her, to accept the direction of the Devil rather than the instructions of the God who had created her and who brought her into an earthly paradise.

"And when the woman saw that the tree was good for food, and that it was pleasant to the eyes, and a tree to be desired to make one wise, she took of the fruit thereof, and did eat, and gave also unto her husband with her; and he did eat."

Genesis 3:6 KJV

Yet many believe that God expected Adam and Eve to sin, with them having been made in the image of God. Yet that God used this scenario in order to implement God's redemption plan through Jesus, in order to reconcile humans to God via their faith in God's grace shown to them in the redemption plan revealed in God's only begotten Son. Thus breaking the God and humans created in the image of God barrier. Yet this is another issue.

Yet in spite of the misleading yet apparently appealing and convincing advice from the Serpent to Eve, by her taking such advice instead of listening to God, sin, illness, disease, and death came into the world.

Yet God delivered us from such an adverse affect of sin as death, if we put our faith in God's only begotten Son, Jesus Christ.

"But now being made free from sin, and become servants to God, ye have your fruit unto holiness, and the end everlasting life. For the wages of sin is death; but the gift of God is eternal life through Jesus Christ our Lord."
Romans 6:22-23 KJV

The aborted baby tissue cells could be considered similar to the fruit from the tree that God commanded Adam and Eve not to eat in the Garden of Eden, even though it was argued by the serpent that doing so would be beneficial to them. So it again comes down to a matter of faith, as we decide who to ultimately obey: the Devil, others, ourselves, or God.

"I will not kill children to live."—Bishop Strickland

Who do you think would be excited about seeing the whole world taking vaccines made from or developed using fetal cell lines gained from offing unborn children, Satan or God?

Wouldn't this be a victory for Satan, to get people to trust so-called medical experts or health advisors above following one of the most basic laws in the Book, "Thou shalt not kill." Of course, such being explained away as being alright because these abortions took place in the 60s or 70s, or a week ago, or whenever they might have occurred, or because such fetal cell lines were only used in development, and therefore only small traces of these, or allegedly none at all, would be in the vaccine product, while them still having been used in the development or in testing.

As the serpent said to the woman, "Ye shall not surely die: For God doth know that in the day ye eat thereof, then your eyes shall be opened, and ye shall be as gods, knowing good and evil", can you hear similar words, like the following, being said to us now, "It's better to take a vaccine produced using fetal cell lines than to not take it, for by doing so, you will not surely die, the dangers are not valid, and the killing that took place to produce such a vaccine is not your fault. What's more, by taking your special little potentially painful arm jab, you and all your friends could soon be free from an unjustly imposed lock down. You will be benefited by swiping left on that old, overrated, silly commandment of 'Thou shalt not kill', especially concerning such small, little lives that weren't themselves yet contributing to the economy that much, being so small and not yet knowing how to speak. Plus, you will be helping others by not listening to that widely considered irrelevant creator of the omniverse. Just be cooperative and take your shot. Stop being such a fussy bucket. Don't you know that so many of us want you to take your shot? Or at least allegedly there are many of us who want you to do this. So whether you believe God wants you to or not, listen to me instead."

If God wanted our medical practices to include methodologies that could only be

accomplished by us going beyond God's moral code, I feel God would have told us about this. Yet there is no such indication in God's Word that God stated anything similar to the following statement: "Although I indeed did say, 'Thou shalt not kill', and I stated that life begins in the womb, yet since I haven't the capabilities to deal with pestilence, man made or otherwise, without going against one of my previous teachings, and since I just ran out of ideas on how to help the people I created, let's all use vaccine products that, by the way, are not necessary, yet you take anyways because some of you trust science above myself, yet nonetheless, was created by disobeying one of the commandments I gave on Mount Sinai, but let's not get picky, you've found a possible preventative measure to be taken, or possibly a greater bringer of misfortune, so forget about the whole 'Thou shalt not kill' thing, and you guys go ahead and use those fetal cell lines that no one morally had the right to use in the first place, and then whistle Dixie to yourselves in celebration. Woo-hoo science! Forget about my commandments!" God has said nothing of the like.

Yet God has said:

"Seek ye the Lord while he may be found, call ye upon him while he is near: Let the wicked forsake his way, and the unrighteous man his thoughts: and let him return unto the Lord, and he will have mercy upon him; and to our God, for he will abundantly pardon."
Isaiah 55:6-7 KJV

NIAID Director Dr. Anthony Fauci said regarding this: "Science will get us through this."

NIH Director Dr. Francis Collins said regarding this: "And then hang on; because science, the best science you can imagine, led by amazing people like Tony Fauci and many others, is gonna come forward here, with what we believe will be ultimately a chance to get back to the lives that we were...leading in 2019."

When commenting on the progress of their Covid-19 vaccine, which used fetal cell lines in the production of or testing of it, Pfizer's chairman and Chief executive, Albert Bourla, said, "Today is a great day for science and humanity".

Although I do not know whether these three people quoted above realize that choosing a scientific option that goes outside of the will of God is not wise, or whether they believe that the use of vaccines containing, developed, tested, or produced while using fetal cell lines is not ethical, if this is so, I pray God leads them, and all of us, to a knowledge of God's will regarding such things.

Science is a helpful thing to use to benefit humans, but science can also be used in an ungodly manner to do ungodly things. Science in and of itself is not the answer; God is the answer. And if God allows a scientific breakthrough to occur that is in accordance with God's will, than great. But if a scientific answer is brought forth that requires us to break one of God's directives, even subtly, this is not great.

"Prove all things; hold fast that which is good. Abstain from all appearance of evil. And the very God of peace sanctify you wholly; and I pray God your whole spirit and soul and body be preserved blameless unto the coming of

our Lord Jesus Christ.”
1 Thessalonians 5:21-23 KJV

The interesting thing is, that if such a pandemic was brought forth by evil forces, or even if the widely promoted reaction to it was brought forth by evil forces, which without much fanfare was subtly being attempted to be slipped off to the masses as their only hope for survival, involved the world willingly taking a proposed remedy that would harm their health and also cause them to disobey a commandment of God, this would be something that Satan would likely celebrate. Yet not so much openly, as Satanists know that making such things obvious would likely cause many to not fall for such deceptions.

“For we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places.”
Ephesians 6:12 KJV

This is where the church could stand up against anything that goes against God’s teachings, like, for example, the killing of unborn babies, and the use of their fetal cell lines to produce or make vaccines or other medicines. Therefore, then the church could recommend that any proposed medical remedies actuated by doing such could be presented as not the best course to take due to God’s instructions to the contrary.

“The first of the firstfruits of thy land thou shalt bring into the house of the Lord thy God. Thou shalt not seethe a kid in his mother's milk.”
Exodus 23:19 KJV

If by obeying God, everyone dies from Covid-19 in a month, we are still better off obeying God and trusting in God. For God is the giver to us of our lives, and Covid is not off of God’s radar of comprehension. Furthermore, even if we die tomorrow, by placing our faith and trust in God, we can have everlasting life.

Yet in all actuality, the risks of dying from Covid might be closer to the risk of dying from the flu. Yet since suspect stats are crammed down our throats on a nightly basis, and in spite of the fact that most people do not often see bodies of people who have died from Covid lying in their hallways or streets, or know anyone who has died from it, except for maybe a few, and because we seem to have been scared into acting like this is the case, some arguably have delusional fear of Covid. This is often more of a big media and government imposed fear than a rational one.

Since God is so powerful, let’s not participate in any medical prevention or treatment that used or uses fetal cell lines of aborted babies in the vaccines or in the production of the vaccines.

Disease and death originally came because of our disobedience of God; so now, in trying to deal with disease, should we disobey God?

I say, “No.” For this would not be wise.

“And if it seem evil unto you to serve the Lord, choose you this day whom ye

will serve; whether the gods which your fathers served that were on the other side of the flood, or the gods of the Amorites, in whose land ye dwell: but as for me and my house, we will serve the Lord.”
Joshua 24:15 KJV

5. Why Some Believe That the Pfizer-BioNTech COVID-19 Vaccine (Tozinameran) Should Not Be Taken by Christians and Others Who Value Life

Was the Pfizer-BioNTech Covid-19 Vaccine developed using fetal cell tissues?

I was not there when this vaccine was produced or developed or tested, yet it has been reported that "the Pfizer-BioNTech vaccine uses the HEK-293 cell line from a 1972 abortion only to confirm that messenger RNA was properly coding for the spike protein of the SARS-CoV-2 virus." Yet that's enough reason for me not to take this vaccine.

Yet since I haven't taken a flu shot in decades, eat a healthy diet, get enough vitamin D, exercise, and due to my faith in God, I have no worries about catching Covid-19.

Fr. Tadeusz Pacholczyk points out, in a recent Public Discourse essay, that:

“In recent months, through HHS-BARDA, the Trump administration has been channeling hundreds of millions of dollars of taxpayer funds directly into the development of COVID-19 vaccines that use abortion-derived cells for their production.”

“Disbursement of research funding needs to be tightly linked to our vision of good, ethical science. The decision to vigorously fund initiatives that use cell lines from direct abortions not only implies moral approval for the initiative, but is strongly causally linked to the continued reliance on such cells throughout industry and research, in contradistinction to the decision by single end users who provisionally receive such drugs and methodically convey their strong objections to the coercion implied by the continued development and use of these pharmaceuticals.”

“None of us should have to take drugs that have any connection, even a very remote one, to abortion; but because our society made the dire mistake of legalizing fetal homicide in 1973, we must now contend with the infiltration of abortion-derived materials into numerous areas of biomedical research and development. The COVID-19 pandemic offers us a unique opportunity to confront these problems, and to take decisive steps toward real change.”

The Public Discourse Website has an article about this entitled:

Is Receiving the Pfizer-BioNTech COVID-19 Vaccine Ethical?

In this article, the authors Jeffrey J. Barrows, DO, MA (Ethics) and Jonathan Imbody state the following:

“The Administration’s Operation Warp Speed has funded six vaccine candidates, all of which are associated, though in differing ways as explained below, with cell lines from an aborted baby. The Pfizer-BioNTech vaccine is associated with the HEK-293 cell line, derived from an abortion nearly half a century ago.”

“Unlike the aforementioned COVID-19 vaccine candidates that rely on abortion-derived cells for their ongoing production, the Pfizer-BioNTech vaccine uses the HEK-293 cell line from a 1972 abortion only to confirm that messenger RNA was properly coding for the spike protein of the SARS-CoV-2 virus.”

6. Who Should Be against Taking a COVID-19 Vaccine?

At the moment, I believe everyone should be against taking a Covid-19 vaccine.

Since there are currently very effective ways to deal with this pandemic, much of which that have not been tried by much of the world as of yet, without taking a potentially unethical and unproven vaccine, or any vaccine, even if ethical and proven not to have adverse side effects, I believe it is definitely not the right time to take a Covid-19 vaccine.

Yet if people first try the other methods of reducing the risk of catching Covid-19 and lessening the ill-effects of it if acquired, for example via getting an adequate amount of Vitamin D from sunlight or other sources; refraining from taking a flu vaccine that has been observed to increase the chances of getting Covid-19; using rapid antigen testing to quickly be able to know if you are infected in order to stop or reduce the infection of others; a healthy diet, especially a gluten free diet to help strengthen the heart in case of heart or respiratory issues that could develop with or without catching this virus, and maybe even a vegan diet if one wanted to lessen the risk of zoonotic plagues from attacking us in the future; use of the yet to be approved Ivermectin, a proven safe and effective treatment of parasite infections that has been proven to substantially help if not cure those suffering from Covid-19 disease; and other helpful things; and if these have little positive effect and it is proven that the Covid-19 is getting even worse, and a vaccine neither tested on or produced from or containing fetal cell lines is produced, and it is proven to not make one more susceptible to another virus or even a potential future virus that might be just around the corner, and if one believes one’s own God given immune system is not working well enough, then maybe one such person might consider getting a Covid-19 vaccine, if one could do this out of faith.

“Hast thou faith? have it to thyself before God. Happy is he that condemneth not himself in that thing which he alloweth. And he that doubteth is damned if he eat, because he eateth not of faith: for whatsoever is not of faith is sin.”
Romans 14:22-23 KJV

7. Evidence Showing That Taking the Flu Vaccine Could Increase Chances of Getting COVID-19

Thankfully, it has been reported that none of the 2020-2021 flu vaccines use aborted

fetal material. Yet it might be wise for anyone considering taking such a vaccine to double check this.

Yet there are still other valid reasons why one would choose not to get a flu vaccine.

It has been reported that taking the flu vaccine increases one's susceptibility to any corona virus, including Covid-19.

An article released on the DisabledVeterans.org website, at <https://www.disabledveterans.org/2020/03/11/flu-vaccine-increases-coronavirus-risk/>, states:

"Influenza Vaccine: Military Study Shows 36% Higher Odds Of Coronavirus, 2017-2018"

"Paraphrasing, the study highlights the value of the human body's ability to fight against viruses. Apparently, by contracting influenza, the body naturally `may reduce the risk of non-influenza respiratory viruses...'"

If this is so, so many suggesting that everybody and their monkey's uncle get the flu shot could explain why the rates at which people have been noted as being infected with Covid-19 seems to increase right after a high number of people got their flu shots.

8. Rapid Antigen COVID-19 Testing

Although rapid antigen testing is reported to only show if one were currently infected with the SARS-CoV-2 virus, this is all that would be needed. The PCR Covid-19 tests can show if one were contagious as well as if one were previously infected with the virus. Yet to prevent further spreading of the virus, this additional info is not essential. Because of this, it has sometimes been reported that the antigen test is not as reliable as the PCR test, yet this might be explained by the fact that the antigen tests only reveals current infection status. Yet whether any test were 100% accurate or not, use of such testing could still help reduce the spread of the virus in question.

Getting rapid antigen testing out to a large portion of the population could be a safe way to deal with this virus, whether it was actually as dangerous as it is often portrayed to be or not. And such rapid antigen testing could be done without risking a large percent of the population from taking a potentially unnecessary and potentially harmful and potentially immoral vaccine.

9. Proposed Answers to the COVID-19 Situation

A) Pray to God for deliverance.

B) Consider if not taking a flu vaccine would be best for you, and if it would lessen your susceptibility of acquiring Covid-19.

C) Consider not taking any vaccine, Covid-19 or otherwise, that is made of or

produced with or developed using or tested on fetal cell lines.

D) Get adequate amounts of Vitamin D, from proper exposure to sunlight, or via other sources.

E) Eat healthy, in order to encourage immunity to viruses and to promote health.

F) Through exercise or by other means, try to develop a strong cardiovascular system if possible, making facing a respiratory illness easier to deal with if that ever were to happen.

G) Acquire at-home rapid antigen Covid-19 testing strips, and test, if symptoms arrive, or regularly, to see if you ever became infected so that you would be able to more easily not spread to others.

10. The Big Picture

Since Satan took Jesus around to show Jesus the riches of the world of which Satan was in control of, or allowed temporarily by God to be in control of, and to try to persuade Jesus to turn on his Father and follow him, we know there is a Satanic force in the world.

We could look at things while asking the following questions to try to comprehend the issues we are facing better:

Why would the Devil want this?

Why would God not want this?

Why would God want this?

Why would the Devil not want this?
